EDUCATION

Gitam University, Bachelor of Technology in Electrical and Electronic Engineering - 8.04CGPA 2023-2026
Coursework: Electrical Machines, Battery Technology, Electric vehicles, power Systems. *Bangalore, Karnataka.*
Teegala Krishna Reddy Engineering College 2020 -2023
Diploma in Electrical and Electronic Engineering - 8.18 CGPA *Meerpet,Hyderabad.*

SKILLS

Programming Languages	Embedded-C
Hardware Design	PCB Design
Simulation and Engineering Tools	KiCad , MATLAB Simulink ,Arduino IDE , STM32CubeIDE
Communication protocols	USART , SPI , I2C

EXPERIENCE

Aditya Automation Products and Engineering Pvt. Ltd. Jan 2026
Intern *Bangalore , Karnataka*

- Studied car window regulator systems and understood their working principles, including both manual and power window mechanisms.
- Learned about different types of car window motors and their functional differences in automotive applications..

Bharat Heavy Electricals limited May 2025
Summer Intern *Bangalore, karnataka*

- Worked on the KAVACH Automatic Train Protection System, gaining practical knowledge of trackside and stationary components such as RFID tags, Stationary Master Computer, Vital Computer, and RIU.
- Gained exposure to key railway safety and signaling Systems, including TCAS and SM-OCIP.

PROJECTS

SAEREEV-Electric Drive system, Description: Participated in SAEREEV 2026 and secured 2nd Runner-Up (3rd Prize) at GITAM University, Bengaluru.

• **Role:** Worked on electric drive systems involving motor operation and drive concept.Gained hands-on exposure to electric vehicle powertrain fundamentals.Collaborated as a team to design, analyze, and present an electric drive solution.

Remote Controlled Grass Cutter, Description: Designed and built a remote-controlled grass cutter to simplify and improve safety in lawn maintenance.Enabled wireless operation, allowing users to control the device from a distance and avoid direct contact with the blades ,developed the Android app using MIT App

Fall Prevention for Elderly People , Description: Worked on a project to prevent falls among the elderly as part of the Smart India Hackathon (SIH). Designed a user-friendly system using sensors and real-time monitoring to detect fall risks and send immediate alerts to caregivers. Aimed to improve safety, support mobility, and promote independent living for senior citizens through continuous tracking and timely intervention.

ACHIEVEMENTS

- Secured 3rd place in Smart India Hackathon (14/09/2024) for a fall prevention project for elderly people
- Secured 3rd place in AARAMBH Event (16/02/2024), Bangalore, for a remote controlled grass cutter project
